

## Chapter-3 | Landforms and Life

## Worksheet-1

JINENDER SONI  
Founder, MISSION GYAN

## Multiple Choice Questions

- A landform is best described as:**
  - A type of climate
  - A physical feature on the Earth's surface
  - A type of soil
  - A water body
- Which of the following is NOT a major landform?**
  - Mountain
  - Plateau
  - Plain
  - River
- Mountains are recognised by:**
  - Flat surface and fertile soil
  - Broad base, steep slopes and narrow summit
  - Sandy surface and dunes
  - Low height and gentle slope
- Other highlands with lower height and rounded tops are called:**
  - Plateaus
  - Plains
  - Hills
  - Valleys
- Which is the highest mountain peak in the world?**
  - Mount Kilimanjaro
  - Mount Kanchenjunga
  - Mount Everest
  - Mount Aconcagua
- Terrace farming is practised mainly in:**
  - Plains
  - Deserts
  - Mountain slopes
  - Plateaus
- Plateaus are often called the \_\_\_\_\_ of minerals.**
  - Storehouses
  - Oceans
  - Gardens
  - Valleys
- Floodplains are formed by the deposition of:**
  - Lava
  - Ice
  - Sediments
  - Rocks
- Plains are generally not more than \_\_\_\_\_ metres above sea level.**
  - 100
  - 200
  - 300
  - 500

10. Which landform supports dense population due to fertile soil and flat land?

- (a) Mountains (b) Plateaus  
(c) Plains (d) Deserts

### Fill in the blanks :

11. A \_\_\_\_\_ is a physical feature on the surface of the Earth.  
12. Floodplains are very fertile because rivers deposit \_\_\_\_\_ in them.

### True / False

13. Mountains, plateaus and plains are the three main types of landforms.  
14. All deserts are hot.

### Very Short Type Questions

15. What is a plateau?  
16. Name any one occupation of people living in the mountains.

### Short Type Questions

17. Why are mountains important for rivers? Explain briefly.  
18. How do plains support agriculture and human life?

### Essay Type Questions

19. Describe the main features of mountains and the life of people living there.  
20. Explain plateaus as a landform and mention their importance.

### HOTS

21. **Assertion (A):** Floodplains are ideal for agriculture.  
**Reason (R):** Rivers deposit sediments in plains, making the soil fertile.  
Choose the correct option:  
a) Both A and R are true, and R explains A  
b) Both A and R are true, but R does not explain A  
c) A is true, but R is false  
d) A is false, but R is true

# CBSE CLASS-6 | Geography

## Chapter-3 | Landforms and Life

### Worksheet-1

#### Answer & Solution

1. (b) A physical feature on the Earth's surface
2. (d) Plateau
3. (b) Broad base, steep slopes and narrow summit
4. (c) Hills
5. (c) Mount Everest
6. (c) Mountain slopes
7. (a) Storehouses
8. (c) Sediments
9. (c) 300
10. (c) Plains
11. landform
12. sediments
13. True
14. False
15. A plateau is a landform that rises above the surrounding land and has a flat surface.
16. Farming / herding / tourism (any one)
17. Mountains are important for rivers because snow melts at lower altitudes and feeds rivers. Many major rivers originate in mountain regions.
18. Plains support agriculture due to flat land and fertile soil. They also support dense population and economic activities like farming and transportation.
19. Mountains are high landforms with steep slopes and narrow summits. They have cold climate and are the source of many rivers. People practise terrace farming, herding and tourism in mountain regions.
20. Plateaus have flat tops and steep sides. They are rich in minerals and support mining activities. Some plateaus also have fertile soil and waterfalls, making them important for human life.
21. **Correct option: (a)**  
**Explanation:** Floodplains are fertile because rivers deposit sediments, which makes them ideal for agriculture.
