Lesson - 6

If I could be an Astronaut

Part - 7

Rima Bharali

16. Look at the picture and read the
sentences:

Aryabhata was an astronomer,
Astronomer study space planets
and other natural objects in
space. An astronomer is a
scientist who studies astronomy.

Kalpana Chawla was an astronaut. An astronaut is a person who travels and works in a spacecraft . Kalpana Chawla was the first woman of Indian origin to fly to space.

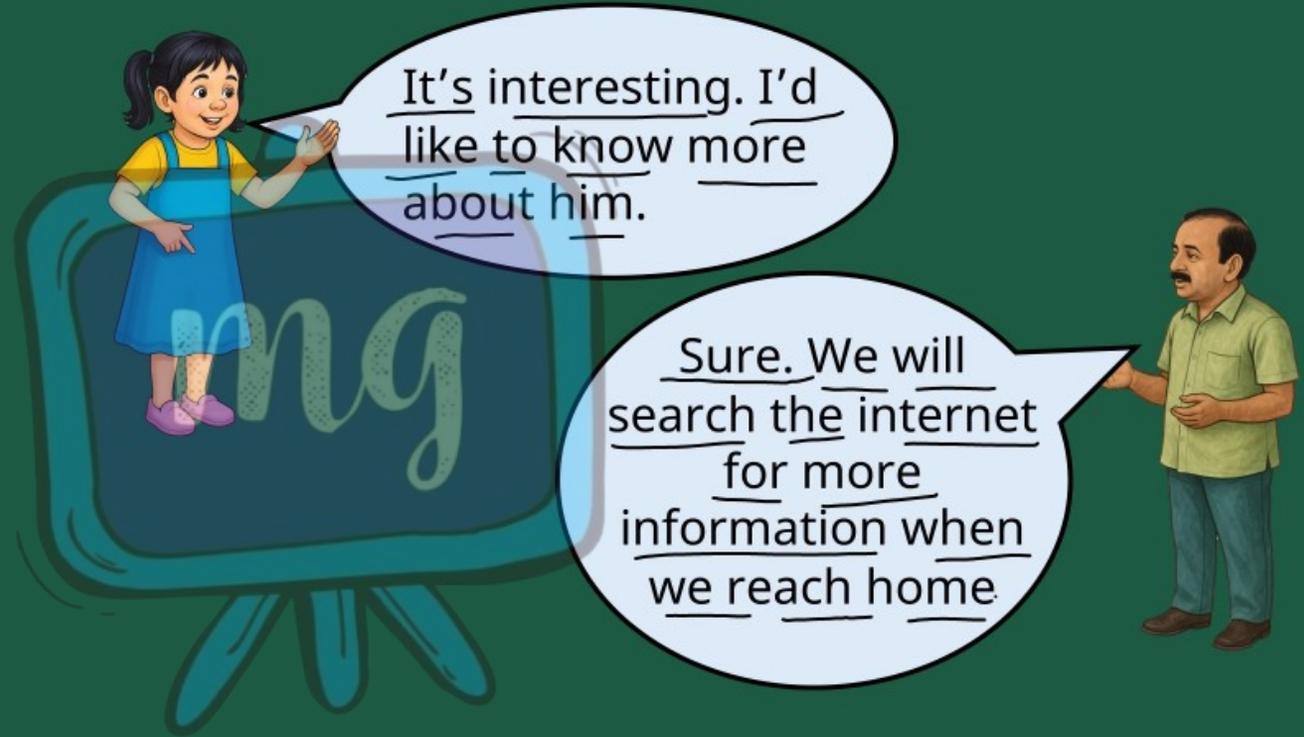

17. While returning from the science fair, Anu asked her father about the person on the poster. Let's read their conversation.

Father, do you know the name of the person on the poster?

Of course. His name is Aryabhata. He is the first Indian astronomer and a mathematician

I's interesting. I'd like to know more about him.

Sure. We will search the internet for more information when we reach home.

18. Project work :

Collect photographs of astronauts. Paste
them in a chart paper.

19. These are a few pictures of Anu's
journey to the moon. Write a story
on what you see in the pictures.
You may take help from the story
'Anu's Dream'.

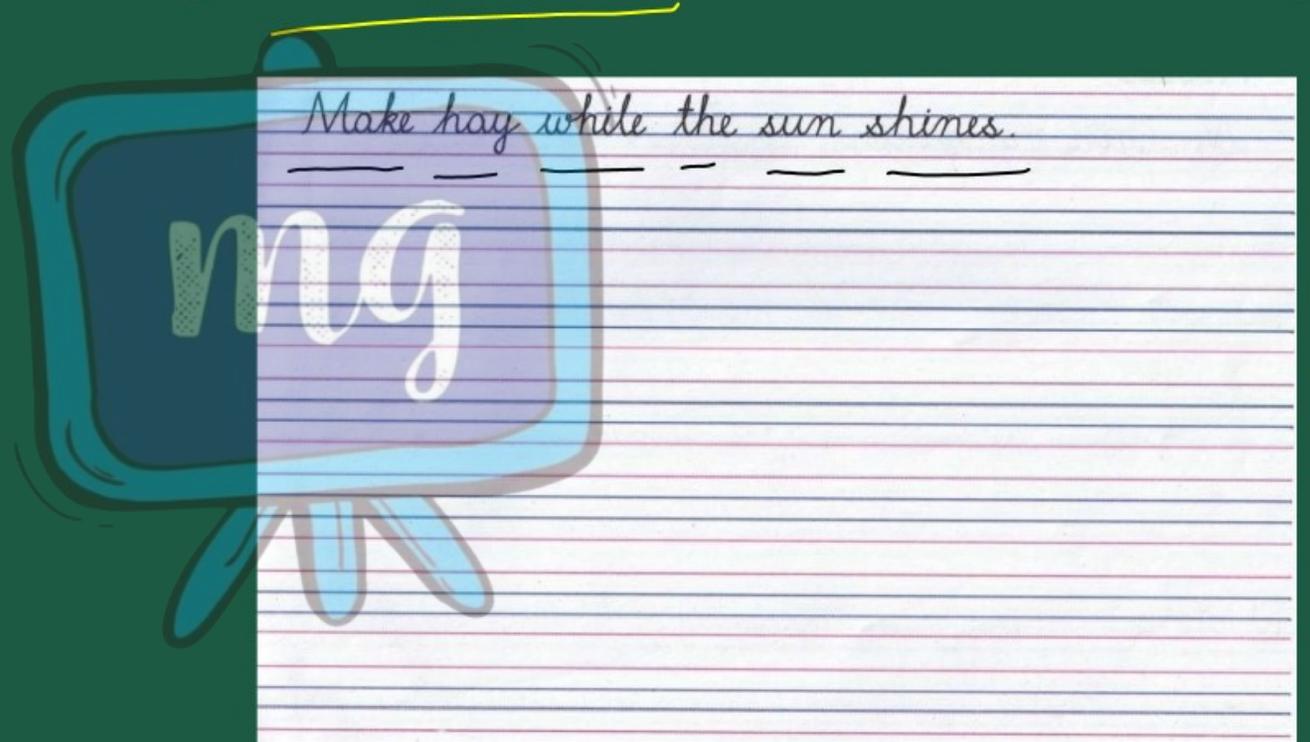

mg

Anu is a little girl who dreams of being an astronaut. One night, she flies into space in her rocket. She looks out of the window and sees many stars and planets shining brightly. Anu's rocket lands softly on the moon. She steps out, wearing her spacesuit, and sets up a small tent to rest. Anu feels happy and explores the moon, looking at the beautiful view of Earth from far away. After her adventure, Anu returns to her rocket and comes back to share her story with everyone.
