

## CHAPTER-1 | Variations in Psychological Attributes

QUIZ  
PART-07

1. Which statement best defines intelligence according to Wechsler?
- The ability to judge well, understand well and reason well
  - The power of perceiving, learning, understanding, and knowing
  - The global and aggregate capacity to think rationally, act purposefully, and deal effectively with the environment
  - The ability to solve mathematical problems and use language fluently (C)

**Explanation:** Wechsler described intelligence as a global and aggregate capacity involving rational thought, purposeful action, and effective adaptation.

2. Which model explains intelligence in terms of Planning, Attention-arousal, Simultaneous-successive processing?
- Triarchic Theory
  - Structure-of-Intellect Model
  - Theory of Multiple Intelligences
  - PASS Model (D)

**Explanation:** The PASS Model defines intelligence through Planning, Attention-arousal, Simultaneous, and Successive processing.

3. In Gardner's theory, which type of intelligence involves understanding one's own feelings and motives?
- Interpersonal Intelligence
  - Intrapersonal Intelligence
  - Emotional Intelligence
  - Contextual Intelligence (B)

**Explanation:** Intrapersonal intelligence concerns self-awareness, insight into one's feelings, motives, and desires.

4. Which of the following is a performance-based intelligence test?
- CIE Verbal Group Test
  - Draw-a-Man Test
  - Group Test of General Mental Ability
  - Test of General Mental Ability (Hindi) (B)

**Explanation:** Draw-a-Man Test is categorized as a performance test, as it requires visual and motor skills.

5. What is the IQ of a 10-year-old child with a mental age of 12?
- |        |            |
|--------|------------|
| A. 110 | B. 120     |
| C. 90  | D. 100 (B) |

**Explanation:**  $IQ = (MA/CA) \times 100 = (12/10) \times 100 = 120$ .

6. Which of the following is NOT a component of Sternberg's triarchic theory of intelligence?
- Experiential
  - Componential
  - Emotional
  - Contextual (C)

**Explanation:** Sternberg's triarchic theory has three components—componential, experiential, and contextual; emotional is not included.

7. The intelligence of identical twins reared together correlates to approximately:
- 0.50
  - 0.72
  - 0.90
  - 0.25 (C)

**Explanation:** Studies show a correlation of about 0.90 for identical twins reared together, indicating strong genetic influence.

8. Which one of the following is NOT a method used for psychological assessment?
- Observation
  - Self-report
  - Experimentation
  - Interview (C)

**Explanation:** The major methods include tests, interview, case study, observation, and self-report; experimentation is not considered a method of psychological assessment here.

9. Which type of intelligence is associated with the ability to produce and manipulate musical rhythms and patterns?
- Spatial
  - Logical-Mathematical
  - Musical
  - Naturalistic (C)

**Explanation:** Gardner's model specifies musical intelligence as the ability to perceive, create, and manipulate musical patterns.

10. According to the Indian tradition, which term closely resembles the Western concept of intelligence?
- Gyan
  - Vivek
  - Buddhi
  - Smriti (B)

**Explanation:** The Indian tradition uses the term Buddhi to represent intelligence, integrating cognitive, emotional, and ethical aspects.
