

## CHAPTER-11 | Nature's Treasures

QUIZ  
PART-02

1. Water is essential for:

- A. Only animals
- B. Only plants
- C. Life
- D. Only industries (C)

*Explanation:* All living things need water to stay alive.

2. Which is a source of freshwater?

- A. Oceans
- B. Seas
- C. Rivers
- D. Salt lakes (C)

*Explanation:* Rivers provide freshwater that can be used in daily life.

3. Most water on Earth is found in:

- A. Rivers
- B. Lakes
- C. Oceans and seas
- D. Wells (C)

*Explanation:* Most Earth's water is salty ocean water.

4. Water pollution can happen when:

- A. Trees grow
- B. Waste is thrown into rivers
- C. Rain falls
- D. Wells are cleaned (B)

*Explanation:* Waste makes water dirty and unsafe.

5. Oil spill is dangerous because it:

- A. Adds oxygen to water
- B. Blocks sunlight and harms animals
- C. Makes water sweeter
- D. Creates soil (B)

*Explanation:* Oil forms a layer that stops light and harms aquatic life.

6. Freshwater should be conserved because it is:

- A. Unlimited
- B. Easy to make
- C. Limited
- D. Salty (C)

*Explanation:* Usable freshwater is small in amount, so it must be saved.

7. Which is a good way to save water?

- A. Keep taps open
- B. Repair leaking taps
- C. Throw water away
- D. Use more than needed (B)

*Explanation:* Fixing leaks prevents water from being wasted.

8. Rainwater harvesting means:

- A. Making rain
- B. Storing and using rainwater
- C. Polluting groundwater
- D. Boiling river water (B)

*Explanation:* It saves rainwater for future use instead of wasting it.

9. Stepwells help in:

- A. Air pollution
- B. Forest cutting
- C. Water collection and conservation
- D. Fuel formation (C)

*Explanation:* Stepwells store and conserve water from rain and seepage.

10. Industries also need water because water is used in:

- A. Only drinking
- B. Many work processes
- C. Only farming
- D. Only bathing (B)

*Explanation:* Water is needed in factories for many industrial activities.
