

CHAPTER-5 | Natural Vegetation And Wildlife

QUIZ
PART-06

1. Rubber plants belong to:

- A. Tundra
- B. Tidal
- C. Himalayan
- D. Tropical Evergreen (D)

Explanation: Rubber plants grow in tropical evergreen forests.

2. Cinchona trees need more than:

- A. 100 cm rainfall
- B. 50 cm rainfall
- C. 70 cm rainfall
- D. Less than 50 cm (A)

Explanation: Cinchona trees grow in areas with over 100 cm of rainfall.

3. Simlipal Biosphere Reserve is in:

- A. Odisha
- B. Punjab
- C. Delhi
- D. West Bengal (A)

Explanation: Simlipal is located in Odisha.

4. Which biosphere reserve is NOT in the world network?

- A. Panna
- B. Nilgiri
- C. Manas
- D. Gulf of Mannar (A)

Explanation: Panna is not in the world network.

5. Biosphere reserves are for:

- A. Flora only
- B. Fauna only
- C. Biodiversity and sustainable use
- D. Urban development (C)

Explanation: Biosphere reserves conserve biodiversity and encourage sustainable use.

6. Tropical vegetation animals include:

- A. Elephant
- B. Snow Leopard
- C. Kashmir Stag
- D. Leopard (A)

Explanation: Tropical forests are home to elephants and other species.

7. Montane forests have:

- A. Pine, Deodar
- B. Oak
- C. Bamboo
- D. Mangrove (A)

Explanation: Montane forests at 1500-3000m have Pine and Deodar trees.

8. Flora refers to:

- A. Animal life
- B. Plant life
- C. Climate
- D. Humans (B)

Explanation: Flora refers to plant life in a region.

9. Tropical Evergreen forests stay green due to:

- A. Low rainfall
- B. High rainfall
- C. Snow
- D. Cold temperatures (B)

Explanation: They receive more than 200 cm of rainfall annually.

10. India's biodiversity is due to:

- A. Population
- B. Size and climate
- C. Urbanization
- D. Industrialization (B)

Explanation: India's diverse climate and size support rich flora and fauna.
