

CHAPTER-1 | Variations in Psychological Attributes

QUIZ
PART-04

1. Which statement best describes an individual intelligence test?
- Administered to one person with no examiner interaction
 - Administered to groups with minimal supervision
 - Administered to one person and requires the examiner to adjust to the person's mood
 - Always uses only picture-based items (C)

Explanation: Individual tests are given to a single person, and the examiner adjusts to the subject's feelings and mood.

2. Which feature characterizes group intelligence tests?
- Require adaptation to each subject's mood
 - Do not require the examiner to adjust to each subject's mood
 - Always involve moving blocks or objects
 - Must be administered orally (C)

Explanation: Group tests are given to many individuals at once and do not demand mood-based adjustments by the examiner.

3. Raven's Progressive Matrices (RPM) is an example of which type of test?
- Verbal test
 - Performance test
 - Non-verbal test
 - Culture-biased test (C)

Explanation: RPM uses pictures/figural items and is cited as a non-verbal intelligence test.

4. Koh's block activity is used to illustrate which category of tests?
- Verbal tests
 - Non-verbal tests
 - Performance tests
 - Culture-fair tests (C)

Explanation: Performance tests require manipulation or movement of objects/materials, as in Koh's block activity.

5. What best defines a culture-fair test?
- Measures only language-based abilities
 - Is suitable for testing intelligence across different cultures
 - Is designed for a specific cultural group
 - Requires extensive cultural knowledge (B)

Explanation: Culture-fair tests are culturally appropriate and suitable for people from diverse cultural backgrounds.

6. Who made a pioneering attempt to construct an intelligence test in Hindi in the 1930s?
- Uday Shankar
 - S. Jalota
 - S.M. Mohsin
 - R. Ramalingaswamy (C)

Explanation: S.M. Mohsin is noted for an early, pioneering Hindi intelligence test in the 1930s.

7. Which pairing of Indian test and author is correct?
- CIE Verbal Group Test of Intelligence — Uday Shankar
 - Draw-a-Man Test — Bhatia
 - Group Test of General Mental Ability — Bureau of Psychology, Allahabad
 - Bhatia's Battery of Performance Tests — Pramila Pathak (A)

Explanation: Uday Shankar developed the CIE Verbal Group Test; other pairings listed are mismatched.

8. What does Vygotsky's view highlight about culture?
- Culture determines IQ purely genetically
 - Culture gives a social setting where people learn, live, and grow
 - Culture eliminates the need for formal testing
 - Culture focuses only on emotional development (B)

Explanation: Vygotsky emphasized culture as the social context that scaffolds learning and development.

9. In technologically advanced societies, children tend to develop which kinds of skills?
- Memorization and imitation only
 - Generalisation, abstraction, and tech-based thinking
 - Solely non-cognitive habits
 - Exclusive focus on physical coordination (B)

Explanation: Tech-advanced contexts foster generalisation, abstraction, tech-based thinking, and focus on cognitive skills like attention and memory.

10. Which of the following is NOT listed as a facet of integral intelligence?
- Cognitive competence
 - Emotional competence
 - Entrepreneurial competence
 - Physical stamina (D)

Explanation: Integral intelligence includes cognitive, social, emotional, and entrepreneurial competence; physical stamina is not included.
