

CHAPTER-7 | Factors of Production**QUIZ
PART-07**

1. Factors of production work:

- A. Independently
- B. Alone
- C. Together
- D. Without capital (C)

Explanation: They support each other.

2. Example of capital-intensive product:

- A. Agriculture
- B. Construction
- C. Handicrafts
- D. Semiconductors (D)

Explanation: Requires more capital.

3. Missing factors cause production to:

- A. Increase
- B. Slow/stop
- C. Remain the same
- D. Increase efficiency (B)

Explanation: Missing factors slow production.

4. Which is labour-intensive?

- A. Satellites
- B. Agriculture
- C. Computers
- D. Chemicals (B)

Explanation: Requires more labour.

5. Technology in agriculture reduces:

- A. Labour
- B. Machines
- C. Time
- D. Output (A)

Explanation: Machines reduce manual labour.

6. 3-D printing helps in:

- A. Textiles
- B. Agriculture
- C. Transport
- D. Engineering (A)

Explanation: Revives textile production.

7. Factors of production are:

- A. Independent
- B. Unrelated
- C. Complementary
- D. Not necessary (C)

Explanation: They work together.

8. Testing in mobile manufacturing is for:

- A. Packaging
- B. Quality check
- C. Sales
- D. Assembly (B)

Explanation: Ensures quality and performance.

9. Who coordinates production?

- A. Engineers
- B. Project Managers
- C. Workers
- D. Customers (B)

Explanation: They handle coordination and planning.

10. Distant input reliance risks:

- A. Faster production
- B. Disruption
- C. More resources
- D. Cheaper labour (B)

Explanation: Leads to supply chain issues.
