

Chapter - 1 | Variations in Psychological Attributes

QUIZ-01

1. Which of the following is NOT a component of Sternberg's Triarchic Theory of Intelligence?
- A. Componential B. Experiential
C. Emotional D. Contextual (C)

Explanation : Sternberg's Triarchic Theory includes Componential, Experiential, and Contextual intelligences. Emotional intelligence is not a part of this theory.

2. Who proposed the theory of multiple intelligences?
- A. Robert Sternberg B. Howard Gardner
C. Alfred Binet D. J.P. Das (B)

Explanation : Howard Gardner proposed the theory that suggests intelligence is not a single ability but consists of eight independent intelligences.

3. The 'g-factor' in Spearman's theory stands for:
- A. General intelligence
B. Group intelligence
C. Gross intelligence
D. Generated intelligence (A)

Explanation : In Spearman's two-factor theory, the g-factor represents general intelligence that influences performance across all tasks.

4. Which intelligence helps a person understand their own feelings and motives?
- A. Interpersonal B. Spatial
C. Intrapersonal D. Naturalistic (C)

Explanation : Intrapersonal intelligence refers to a person's ability to understand their own feelings, desires, and motives.

5. Which is NOT a method used in psychological assessment?
- A. Self-report B. Observation
C. X-ray D. Interview (C)

Explanation : Psychological assessment includes self-report, observation, interview, case studies, and tests — not X-rays.

6. Which test measures special abilities in specific fields like mechanics or language?

- A. Intelligence Test B. Performance Test
C. Aptitude Test D. Personality Test (C)

Explanation : Aptitude tests measure the potential for acquiring specific skills like mechanical or language ability.

7. What does IQ stand for?

- A. Intelligent Quotient B. Intellectual Quality
C. Intelligence Quotient D. Individual Quotient (C)

Explanation : IQ stands for Intelligence Quotient, calculated as $MA/CA \times 100$.

8. Emotional intelligence is mainly concerned with the ability to:

- A. Solve math problems
B. Perform mental operations
C. Understand and regulate emotions
D. Create artistic images (C)

Explanation : Emotional intelligence involves understanding and managing one's own and others' emotions effectively.

9. What kind of thinking is emphasized in creativity tests?

- A. Convergent thinking B. Abstract thinking
C. Divergent thinking D. Linear thinking (C)

व्याख्या : Creativity tests focus on divergent thinking, which includes generating multiple, original solutions.

10. In Indian tradition, the term 'Buddhi' includes:

- A. Only reasoning ability
B. Mental effort, feelings, and understanding
C. Technological skills only
D. Memory power only (B)

Explanation : In Indian tradition, 'Buddhi' encompasses mental effort, determination, emotions, understanding, and reasoning.
