

## CHAPTER-3 | A PEEK BEYOND THE POINT

QUIZ  
PART-03

1. How many methods of addition are shown in this part?

- A. 1  
B. 2  
C. 3  
D. 4 (C)

**Explanation:** The chapter clearly shows Method-I, Method-II, and Method-III for addition of tenths.

2. In adding tenths, which parts are added together first?

- A. Tens only  
B. Tenths and whole numbers separately  
C. Hundreds only  
D. Denominators only (B)

**Explanation:** In mixed numbers with tenths, whole numbers are added together and tenths are added together.

3. What is  $2\frac{7}{10} + 3\frac{6}{10}$ ?

- A.  $5\frac{3}{10}$   
B.  $5\frac{13}{10}$   
C.  $6\frac{3}{10}$   
D.  $6\frac{13}{10}$  (C)

**Explanation:** Add whole numbers:  $2 + 3 = 5$ . Add tenths:  $\frac{7}{10} + \frac{6}{10} = \frac{13}{10} = 1\frac{3}{10}$ . Total =  $6\frac{3}{10}$ .

4. Sonu's lower arm is  $2\frac{7}{10}$  units and upper arm is  $3\frac{6}{10}$  units. Total arm length is

- A.  $5\frac{3}{10}$  units  
B.  $6\frac{3}{10}$  units  
C.  $5\frac{13}{10}$  units  
D.  $6\frac{7}{10}$  units (B)

**Explanation:** The chapter's example gives  $2\frac{7}{10}$  and  $3\frac{6}{10}$ . Their sum is  $6\frac{3}{10}$  units.

5. What is  $\frac{3}{10} + \frac{4}{10} + \frac{5}{10}$ ?

- A.  $\frac{12}{10}$   
B.  $\frac{1}{10}$   
C.  $\frac{10}{10}$   
D.  $\frac{13}{10}$  (A)

**Explanation:** Add the numerators because the denominator is the same:  $3 + 4 + 5 = 12$ , so the sum is  $\frac{12}{10}$ .

6. Head =  $2\frac{3}{10}$ , Thorax =  $5\frac{4}{10}$ , Abdomen =  $7\frac{5}{10}$ . Total length is

- A.  $14\frac{2}{10}$   
B.  $15\frac{2}{10}$   
C.  $14\frac{12}{10}$   
D.  $15\frac{12}{10}$  (B)

**Explanation:** Whole numbers:  $2 + 5 + 7 = 14$ . Tenths:  $\frac{3}{10} + \frac{4}{10} + \frac{5}{10} = \frac{12}{10} = 1\frac{2}{10}$ . Total =  $15\frac{2}{10}$ .

7. When  $\frac{10}{10}$  is formed during addition, it becomes

- A. 10 wholes  
B. 1 whole  
C. 0 whole  
D. 1 tenth (B)

**Explanation:** Ten tenths make one whole unit.

8. Which of these is equal to  $\frac{13}{10}$ ?

- A. 13 wholes  
B.  $1\frac{3}{10}$   
C.  $\frac{3}{10}$   
D.  $\frac{10}{13}$  (B)

**Explanation:**  $\frac{13}{10}$  means  $\frac{10}{10} + \frac{3}{10}$ , which is 1 whole and  $\frac{3}{10}$ .

9. The chapter shows how many methods for addition in the beginning?

- A. 1  
B. 2  
C. 3  
D. 4 (C)

**Explanation:** Pages 3, 4, and 5 show Method-I, Method-II, and Method-III.

10. What is the main idea of this part?

- A. Comparing tenths  
B. Reading only fractions  
C. Adding numbers with tenths  
D. Measuring only insects (C)

**Explanation:** This section teaches how to add mixed numbers and fractions involving tenths.
