

## CHAPTER-3 | Climate of India

### QUIZ PART-02

1. What type of climate is found in the northern Himalayan mountains of India?

- A. Tropical Wet
- B. Alpine
- C. Subtropical
- D. Semi-arid (B)

**Explanation :** The northern Himalayan mountains have an alpine climate, characterized by cold, snowy winters and cool summers.

2. Which type of climate is found in the hill stations of India?

- A. Tropical
- B. Temperate
- C. Subtropical
- D. Arid (B)

**Explanation :** Hill stations in India typically experience a temperate climate, with moderately cold winters and mild summers.

3. What type of climate is found in the northern plains of India?

- A. Tropical Wet
- B. Subtropical
- C. Alpine
- D. Desert (B)

**Explanation :** The northern plains of India have a subtropical climate, characterized by very hot summers and cold winters.

4. What climate is found in the Thar Desert?

- A. Tropical Wet
- B. Subtropical
- C. Arid
- D. Temperate (C)

**Explanation :** The Thar Desert has an arid climate, featuring extremely hot days, cool nights, and very little rainfall.

5. Which type of climate is common in the western coastal strip of India?

- A. Semi-arid
- B. Tropical Wet
- C. Alpine
- D. Subtropical (B)

**Explanation :** The western coastal strip of India experiences a tropical wet climate, with heavy rainfall during the monsoon season.

6. What is the climate of the central Deccan Plateau?

- A. Semi-arid
- B. Tropical Wet
- C. Arid
- D. Temperate (A)

**Explanation :** The central Deccan Plateau has a semi-arid climate, with hot summers, mild winters, and moderate rainfall during the rainy season.

7. Which part of India experiences a tropical climate with mild winters and distinct wet and dry periods?

- A. Northern Plains
- B. Western Coastal Strip
- C. Eastern India and Southern Peninsula
- D. Thar Desert (C)

**Explanation :** Eastern India and the southern peninsula experience a tropical climate with mild winters and distinct wet and dry periods, controlled by monsoon winds.

8. Where is most of India's wheat grown due to its climate?

- A. Thar Desert
- B. Northern Plains
- C. Deccan Plateau
- D. Western Coastal Strip (B)

**Explanation :** The northern plains have a subtropical climate, which is ideal for growing wheat.

9. What type of climate does the region around Kolkata primarily have?

- A. Temperate
- B. Tropical Wet
- C. Subtropical
- D. Semi-arid (C)

**Explanation :** Kolkata and surrounding regions generally have a subtropical climate, characterized by hot summers and mild winters.

10. Which region in India has developed unique ways to collect and save water due to its climate?

- A. Northern Plains
- B. Thar Desert
- C. Deccan Plateau
- D. Western Coastal Strip (B)

**Explanation :** The Thar Desert has an arid climate, and people in this region have developed unique methods to collect and conserve water.
